

DESIGN REPORT BY Amy Granados (TEAM Presicion Notes)

Date: 10/3/2024

This design is made to be simple to prevent you from distractions of playing with your notes. The point is to help students keep focused.

The icons were selected to keep the differentiation between the different types of elements in notes clear. We are still trying to decide whether to keep the elements of the notes separate in rows or all in one as shown currently.

The design is to be the same across all platforms of android and ipad to keep a consistent design and feeling across all users.
